Mani Raja Borewell Agencies

No. 55, Keelavaithiyanatha puram.

4th Street,

Madurai-18.

Cell: +91-99425 17752, +91-97901 56622.

## MANIRAJA BOREWELL CONTRACTORS IN MADURAI

Mani Raja Borewell Agencies is the most renowned **Borewell contractors in Madurai**. It was formed by MR. Subramani having experience over 10 years, borewell means an steel Pipe was bored into the ground vertically to extract the ground water. our company uses the most advanced [borewell machine](#) and techniques to obtain underground utilities.

Our [borewell](#) company holds the four super fast and effective [borewell lorry in madurai](#) and 50 enthusiastic technical and non technical staffs, they work as a separate crew in order to finish the work in time. our workers provide you the quick response with an tremendous finishing. because people always needs a better quality and fast service. We having an brilliant Groundwater Surveyors, they help you to choose borewell point in your house or any other properties.

We are the well known [borewells in madurai](#) for [Borewell Drilling](#) firm across madurai and surrounding districts also we had completed a large number of Borewells for domestic, industrial and agriculture requirements. maniraja is a wellknown borewells in madurai.

## Borewell Agencies Quality

- Our [borewell agencies in madurai](#) focus on Customers Satisfaction in service and planning to their needs
- Borewell workers in madurai are Quick in response to the urgent service needs
- Find a way to finish the [borewells](#) work faster & better
- Makes Customer to feel safety and security on selecting borewell point
- Free [Borewell services in madurai](#) given by maniraja [Borewell contractors in madurai](#) customers on incidents
- Constantly improving the skills and introducing new borewell rigs
- Executing the latest Scientific Methods to Explore the excess water

[Mani Raja Borewell Agencies](#) is the Approved borewell contractors in madurai, shows that an most desired and dedicated borewell agencies in madurai for this [borewell drilling](#) service we are well equipped in bore wells machineries that provides you the High Standard quality [borewell services in madurai](#) industries, Government Sectors, public sectors, Apartments, etc.... By using our high pressure [borewell Drilling](#) rig, we drill any range of feet that our customer expects.this shows that we are an best [borewells in madurai](#)

## MANIRAJA BOREWELLS IN MADURAI

[MANI RAJA BOREWELL AGENCIES](#) is a registered and one of the most preferable **borewells in Madurai**. By them experience of over 10 years they can easily handle the big drilling projects such as Government tenders, Housing board..etc. [borewells in madurai](#) always resembles to maniraja [borewell contractors in madurai](#) . Currently our

Maniraja *borewells in madurai* having four [borewell lorry in madurai](#) by that we completed [borewell Drilling](#) has completed thousands of [borewells in madurai](#) for domestic, industrial and agriculture requirements. Maniraja borewells in madurai always uses the latest drilling machines these are capable to drill any extreme of depth. **Borewell drilling** depth is depending on the customer satisfaction and the available water.

## BOREWELL DRILLING SPECIALITY

From the beginning of Maniraja borewells in madurai maintaining its quality of servicing and improving their drilling techniques. Maniraja was a dedicated borewells in madurai to madurai customers with low borewell drilling cost.

- We assure you the Perfect *Borewell Drilling*
- Maniraja is cost effective Borewells in madurai
- We work toward the satisfaction to customers
- We finish Borewell drilling work on time
- Maniraja [borewell contractors in madurai](#) covers depth needed by our customer

## MANIRAJA MANAGEMENT

[MR.V.SUBRAMANI](#) is the proprietor of the company having four [borewell lorry in madurai](#), and his son MR.S.Rajesh (BE). They both are having very good experience and knowledge in the field of borewell drilling. Our proprietor have drilled Bore wells in madurai,tirunelveli,trichy,chennai,vilupuram and all over tamilnadu, By his helping personality he had satisfied the hundreds of workers and them family.

# BOREWELL DRILLING COST

## FOUR INCH BOREWELL SERVICE IN MADURAI

[Four inch Borewells in madurai](#) system set is an open well systems are high quality and high efficiency to electrical designs. [4 inch borewell](#) and borewell contractors in madurai mostly used by [borewell drilling in madurai](#) for area wise related to irrigation and agricultural, industrial, public, rural water supply and so on. This borewell service in madurai was offered by an Maniraja borewells in madurai also borewell drilling cost for this 6 inch borewell is low compared to other borewell contractors.

## 4.5 INCH BOREWELL SERVICE IN MADURAI

[4.5 inches borewells in madurai](#) was provided by Maniraja borewell agencies in madurai these [four point five inch borewell](#) was used for Pressure boosting applications Agricultural, Domestic, Hotels & Industrial and Mainly used for Domestic and Industrial water supply and Irrigation Unit. This [borewell service in madurai](#) was offered by an Maniraja borewells in madurai also borewell drilling cost for this 6 inch borewell is low compared to other borewell contractors.

## Six INCH BOREWELL SERVICE IN MADURAI

[six inch borewells in madurai](#) was given by the Maniraja borewell agencies in madurai. It's approximately range of 150 MM length of the pipes. This type of [6 inch borewell](#) is general type of borewells in madurai suitable and mostly used to Agricultural processes and Mainly drilled upto 1200 FT. Borewell Drilling is the process of producing holes by using specific type of cutting tool. our 6 inch borewell contractors in madurai are drilled when higher yield is required for large apartments or buildings and also for agricultural purposes. This **borewell service** in madurai was offered by an Maniraja borewells in madurai also borewell drilling cost for this 6 inch borewell is low compared to other borewell contractors.

## 8 INCH BOREWELL SERVICE IN MADURAI

[Eight inch borewells in madurai](#) was given by our Maniraja borewell contractors in madurai. they given a variety of materials – including carbon steel, steel alloys, as well as some plastics are manufactured in these standard sizes. An [8 inch Borewell](#) is an excavation or structure created in the ground by Borewell digging, Borewell driving, Borewell boring, or Borewell drilling to access groundwater in underground aquifers. Borewell drilling can get water from a much deeper level than dug wells can—often up to several hundred metres. maniraja borewell agencies in madurai were giving very Hydraulic borewell drillers in Madurai city. This *borewell service in madurai* was offered by an Maniraja borewells in madurai also borewell drilling cost for this 6 inch borewell is low compared to other borewell contractors.

We assure of world class technology was provided by our maniraja borewell contractors in madurai. It is positioned to drill a well by servicing well, Maniraja borewells in madurai giving you the service of low borewell drilling cost.

for more details vist our website [www.manirajaborewells.com](http://www.manirajaborewells.com) for more details vist our website [www.manirajaborewells.com/borewells-in-madurai.html](http://www.manirajaborewells.com/borewells-in-madurai.html)

## Borewell Lorry

we are the very sincere borewell contractors among the other [Borewells in madurai](#) Our [Mani Raja Borewell lorry](#) comes to the working spot with an talented technical and non technical crew in a perfect time. Our **Borewell lorry** was filled with necessary equipments for Borewell drilling,Drilling bit, Drilling Rig ,steel pipes, welding machine, Borewell tools, Sufficient diesel,and Borewell machine that an Main high pressure compressor with that we can drill up to 1250 feet.these are the items are placed on *Borewell lorry in madurai*

## Borewell Drilling Point

Our Hydro Geologist comes with an newly invented instruments and calculate the depth, volume and running stream of an water. And finally our geologist find the ideal point for [borewell drilling](#). some of our non technical workers follows the traditional method of swinging a pendulum and marching towards the [borewell drilling](#) point. this both ways of identification helps us to find the right place and adjust according to our customers sophistication. our crew members mark that [borewell drilling](#) point accurately. all these equipments are found ,

## Borewell Drilling

After an pooja to the underground goddess by maniraja [borewells in maduari](#) crew members. [Borewell](#) Drilling rig was vertically placed on the drilling spot our newly improved compressors are really high in performance an less in sound making. we considerably reducing much noise pollution to you and your neighbourhood families.our [Borewell drilling](#) rigs constantly driven into the soil up to 100 feet with our highly transferable Borewell drilling bit. above this 100 feet, soil surface ends. And the hard

rock started we changing our drilling bit into high pressurised rotary [borewell drilling](#) bit and we relatively reducing the time consumption this shows that we are best of [borewell services in madurai](#)

## Borewell Service Fulfillment

our [borewell service in madurai](#), We always try to fulfil our customer expectations such as [Borewell drilling](#) above the certain feet. Finally we done it and makes them happy by our Borewell service. after an end of this [Borewell drilling](#) process. All the [borewell](#) drill bit lengths were lifted from the bore hole and the bore hole was perfectly sealed with cover in order to avoid the accidents such as animals fall.

Our [Maniraja Borewell agencies](#) Technical staffs giving advice for selecting an [Borewell pump](#) according to their needs and depth. Also we recommend our customers to select latest submersible pump and also our workers fix that submersible pump in a appropriate depth similar to [borewell drilling](#). so that it provides you well integrated speed and crystal clear water. And also [submersible pump](#) is self primed without intervention, it works efficiently, it is also a versatile pump Sump pump is used to keep water out of your basement this thing protect the foundation of your house and the structural uprightness of the house as well.

## Four inches Borewell

Four inches Submersible Pump set is an “open well pump” systems are high quality and high efficiency to electrical designs. Four inch borewell mostly used by [borewell contractors in madurai](#) for area wise related to irrigation and agricultural, industrial, public, rural water supply and so on. It's very easy handle this process. Then it is a

screwed type method so motor giving free vibration and silent process. nice four inch [borewell drilling](#) and its [borewell service in madurai](#) given by our maniraja [borewells in madurai](#). [four inch](#) pumps are high capacity and low maintenance and very economical prices. No regular maintenance is required on submersible pumps. when a submersible pump is fails, to check the pump control box with electrical meters. Then removing the pump from the well.

## Method Of Drilling

1. Water Jetting – Shallow bores in alluvial formations.
2. Augur Drilling – Shallow bores in alluvial formations.
3. Calyx Drilling – Shallow borewell in both hard rock and alluvial formation.
4. Percussion Drilling – Deep bores in bouldery formation.
5. Rotary Drilling – Most common method used for drilling large and deep bores in alluvial formations.
6. Down the Hole Hammering (DTH) Drilling – Most common method for drilling large and deep borewells in hard rock formations.

[Borewell Drillers](#) may sink a borehole using a drilling rig or hand operated rig. We are think about techniques and geological conditions, considered the intended purpose. because is that one and only [customer satisfactory](#). very good four inch [borewell drilling](#) and its [borewell service in madurai](#) given by our maniraja [borewells in madurai](#). four inches and 6 inches borewell are usually drilling process. four inches borewell are most commonly drilled borewells for domestic purpose.

## Charges for drilling borewells

1. Drilling cost per feet,
2. Cost of casing pipe per feet,
3. Cost of drilling and installation charge for casing pipe per feet,

4. Flushing charges per hour for flushing the borewell after drilling and
5. Transportation charges of the rig to the site from nearest town per km.

Then [maniraja](#) Drilling rates are sometimes charged in slabs for specified range especially deep borewells are drilled depending on your facilities. in our [borewell lorry in madurai](#) we having this set of pipes.

## 4.5 Inches Borewells

[Maniraja borewells in madurai](#) telling that A bore well must be flushed periodically for the best yield and safety of the bore well, because ground water may change any time. We are the great expertise in flushing and cleaning bore well through high pressure air compressor, which takes raw water, dust, or wastes and decayed particles if any.

### Features of 4.5 inches

1. Solve the problem of water scarcity.
2. [4.5 inches borewell](#) Use of high speed and high quality hydraulic rig machine.
3. [4.5](#) is an Cost effective solution.
4. Excellent accuracy.
5. Easy to installation Process.
- 6 Economical Price.

### Materials of Construction

PVC Pipes  
GI Pipes

### Applications

1. Pressure boosting applications.
2. [Agricultural](#), Domestic, Hotels & Industrial
3. Mainly used for Domestic and Industrial water supply
4. Irrigation Unit

## Methods

There are three different types of [borewell drilling](#) method here. Hand borewell, low Rig and Rotary Rig Method, Power Rig. so it is very easy and quickly installed to the ground side.

## Hand borewells

Manually operated pump no need for electric supply.  
Affordable cost.  
Easy to repair and maintain the hand [borewells](#).  
Can be used Shallow Wells.

## low Rig and Rotary Rig Borewells

Rotary rigs drill the vast majority of wells today, including all medium and deep wells. The rotary rig consists of four major systems. And an accurate [borewell drilling](#) and its [borewell service in madurai](#) given by our maniraja [borewells in madurai](#). These include the engines, and the hoisting, rotating, and mud systems. [Borewell Drilling](#) up to concrete or hard rocks. Need 2000 liters of water for site work.

## Power Rig Borewells

Power Rig [borewells](#) method has to be done by only one rocks.  
Need a more place in installation process.

## Tubewells

The Tubewell process are engineering wing of the Department of Agriculture executes the works relating to exploration of ground water and correct [borewell drilling](#) and its [borewell service in madurai](#) given by our maniraja [borewells in madurai](#). This process mainly used for farmers and also provides extension services to farmers regarding latest developments in [borewell](#) technology.

## Activities

To install only remote areas.

To investigate the natural ground water bearing formation.

Tubewell and Air Compressor for having better performance.

There are several clients in and around Madurai who prefer only [Mani Raja Borewell Agencies](#) having four [borewell lorry in madurai](#) for any kind of installation pumps service, as we offer services believing in complete customer satisfaction. We are engaged in installing submersible pumps, jet pumps and hand pumps.

## 6 inches borewells

[Maniraja borewells in madurai](#) providing a six inch borewell services It's approximately range of 150 MM length of the pipes. This type borewells setup mostly used to Agricultural process Mainly drilled upto 1200 FT. Drilling is the process of producing holes by using specific type of cutting tool. 6 inch borewells are drilled when higher yield is required for large apartments or buildings and also for agricultural purposes [borewell service in madurai](#) by our maniraja [borewells in madurai](#). Initially larger diameter bits are used to place the casing pipes up to the hard rock zone prior to [borewell drilling](#) specified size of the borewell . 6 inches pipes are very easy to install, noise free, efficient and require minimum maintenance. We are using good quality materials are obtain reliable life and provide maintenance free services.

An Assembled [borewell](#) pipe involves to connecting pipe, threaded pipe, cutting tool, small bearing and big bearing to supported to make the hole in casing pipe along the bore well inside. An great [borewell service in madurai](#) by our maniraja [borewells in madurai](#). In this work, the [borewell drilling](#) machine was assembled with locally available, with manually adjusted materials. these are the materials are placed in maniraja [borewell lorry in madurai](#)

## Applications of 6 inches borewells

1. Water extraction from bores of diameter 6" (150mm) and above.
2. Pressure boosting applications.
3. Domestic and Industrial water supply.
4. Very easy to accessing methods.
5. Water supply to commercial establishments like Hotels, Lodges and Hospitals.

6. Irrigation systems for Agriculture including Drip and Sprinkler systems.
7. Fire fighting mains etc.

## Features of 6 inches borewells

Low Operation Cost  
High quality and high capacity.  
Using energy and efficient motors.  
Very economical price.

## Method Of Drilling

Water Jetting – Shallow bores in alluvial formations, Augur [Borewell Drilling](#) – Shallow bores in alluvial formations, Calyx Drilling – Shallow borewells in both hard rock and alluvial formation, Percussion Drilling – Deep bores in bouldery formation, Rotary Drilling – Most common method used for drilling large and deep bores in alluvial formations. Down the Hole Hammering (DTH) Drilling – Most common method for drilling large and deep [borewells](#) in hard rock formations.

## Charges for borewells

1. [Borewell Drilling](#) cost per feet,
2. Cost of casing pipe per feet,
3. Cost of drilling and installation charge for casing pipe per feet,
4. Flushing charges per hour for flushing the borewell after drilling and
5. Transportation charges of the rig to the site from nearest town per km.

## Borehole

Not like [4.5 inch borewell](#) and borewell [8 inch](#), A borehole is simply a deep narrow well usually driven by an electric pump that taps into the underground stores of water held in permeable rock known as aquifers. We have using small bore hole method with garden on your business premises. boreholes method depended to geothermal installations.

## Borehole

These Pipes are manufactured as per company standards are available in blue colour. SDR pipes are suitable to soil formation is favourable.

## Features and benefits

SDR casing pipes are very easy to install. These pipes are light weight so transportation charges are much easier. This is a major advantages particularly using Rural areas. so these [borewell](#) pipes are quick and convenient to installation with good qualities. These pipes have excellent stiffness and meet all the mechanical properties. One end of pipe is plain end where as other end is socketed for solvent weld joint.

## Advantages

Light Weight, easy to handle, store and install, versallity, high quality, flexible, low cost, excellent corrosion.

There are several clients in and around Madurai who prefer only [Mani Raja Borewell Agencies](#) having four [borewell lorry in madurai](#) for any kind of installation pumps service, as we offer services believing in complete customer satisfaction. We are engaged in installing submersible pumps, jet pumps and hand pumps.

## 8 inches borewell

[Maniraja borewells in madurai](#) providing a eight inch borewell services Pipes in a variety of materials – including carbon steel, steel alloys, as well as some plastics are manufactured in these standard sizes. A water well is an excavation or structure created in the ground by digging, driving, boring, or drilling to access groundwater in underground aquifers. Drilled [borewells](#) can get water from a much deeper level than dug wells can—often up to several hundred metres. We are giving very Hydraulic borewell drillers in Madurai city. When the water can freely drop from a pipe, you can estimate the flow rate by measuring the length. Our company are discussed eligible and trained staff inspects the problems and then explore options for correcting the problem for your convenience. Borewell is depending on the ground inside process. so we are analysing your ideas and giving good prosperity of life long process.

It's approximately range of 200 MM length of the pipes. These pipes are manufactured in Indian Standard products. so its giving a more flexible and comfortable process of

installation. It's Dynamically rotated the rotor ensures the life long process smooth and noisiness operations very easy install the ground strata. Motor rating.perfect [borewell drilling](#) and its [borewell service in madurai](#)given by our maniraja [borewells in madurai](#). so high speed quality of agricultural and industrial applications. [Borewell drilling 8"](#) models are designed to give more reliable and voltage are fluctuations to dynamically balance and fixed rotation process. mostly the pipes are used for borewells and bore – dugwells.

We have specialization in bore well cleaning and installation of pumps, keeping the customer preference at our priority. If you are searching an expert bore well drilling contractor, our company has great reputation in this field and bore well drilling for various dimensions with depth ranging from 150 to 1500 feet. perfect [borewell drilling](#) and its [borewell service in madurai](#)given by our maniraja [borewells in madurai](#). Furthermore, we offer after sales service complying with customer convenience and preference in [borewells in madurai](#). we have started drilling operations by the slow rig, calyx rig to the latest super fast high pressure hydraulic drilling rigs both on surface and in well by 4, 4½, 6 , 8 bore wells. We undertake Geophysical Survey with Guarantee to Customers before putting borewell by Selecting Suitable Methods above materials are placed in maniraja [borewell lorry in madurai](#)

## Features of 8 inches borewells

[8 inch borewell](#) holds Low Operation Cost  
High quality and high capacity.  
Using energy and efficient motors.  
Very economical price.

## Charges for borewells

1. Drilling cost per feet,
2. Cost of casing pipe per feet,
3. Cost of [Borewell drilling](#) and installation charge for casing pipe per feet,
4. Flushing charges per hour for flushing the borewell after drilling and
5. Transportation charges of the rig to the site from nearest town per km.

## Specification

Not like [4.5 inch borewell](#) and borewell [6 inch](#), 8 inch pumps are installed for use in wells with in minimum 8 inch inside diameter. This Products mostly used for area wise related to irrigation and agricultural, industrial, public, rural water supply and so on. To Provide qualified Experienced Geophysical Surveyors, Geologists, Professionals Water Diviners to identify the Borewell points for best results(98% successful rate). To connect the screwed type. Able to run in low voltage. Able to handle the multiple numbers of [borewells](#) with quality. It's very easy to handle this process because customized pumpsets are available on your request. Dynamically balanced motor gives vibration free and free silent process. Drilling in done in all soils including clay and sand. Accurate length with fixed customer satisfactory.

“Mani Raja Borewell Agencies” has very vast experience in water well drilling mainly in Tamil Nadu especially in Madurai City.

There are several clients in and around Madurai who prefer only [Mani Raja Borewell Agencies in madurai](#) having four [borewell lorry in madurai](#) for any kind of installation pumps service, as we offer services believing in complete customer satisfaction. We are engaged in installing submersible pumps, jet pumps and hand pumps.
